5TH - 15TH OF JANUARY 2021 (9-13)

MASK MAKING

WITH HAJO SCHÜLER

Studio Flöz

In the course of the workshop, we build a self-designed full mask made of papier-mâché. The focus is on the authorship of the participant. Starting from the impression of our own face, we search for our own form. We make decisions for a figure, do research on it and develop the character up to the implementation in clay. The entire production process, from the modelled positive, to the negative mother form, to the lamination and the completion of the mask, is accompanied and reflected in a supportive and critical manner.

8TH - 10TH JANUARY 2021 (9-14)

BESIDE THE MASK - BEHIND THE MASK

WITH THOMAS RASCHER

Eden Studios

In this workshop we will put aside the masks for a moment and focus on the question of what can lead to filling a rigid form from within and coming to a greater expressiveness and liveliness. From gesture to sculpture / We encounter different approaches and principles from Michael Chekov's training and transform them into small sculptures. We experience the different qualities and postures through our hands, experience them in silence and move them in our hearts. From sculpture to history / We then develop small stories and, as players, translate them into small sequences. At the end we take up the masks again and bring together actor and mask as a whole.

8TH - 10TH JANUARY 2021 (15-19)

THE AWAKENING OF THE MASK

WITH BJÖRN LEESE

Eden Studios

A still unknown being looks at us, starts to breathe slowly and dares the first step. This awakening of a mask, this birth on stage can have something magical. The uncompromising directness of the figure captures the viewer's gaze and at the same time allows it to become a mirror of its own inner world. The first delicate connection is established. The curiosity and openness of the child to engage unconditionally in encounters shows us the way to the presence that the mask demands. The clown is another important part of the foundation on which the masks of the Familie Flöz stand and live. First encounters with the room, the object and the other partners... the game begins!

15TH - 17TH JANUARY 2021 (10-13)
UNFOLD TECHNIQUE
 WITH VALENTINA BORDENAVE
 Eden Studios

A vigorous, physical and refreshing journey for actors, dancers and other movement performers interested in experiencing the huge potential of movement in theatre. One, two or many... bodies in the space, levels of awareness, themes and strategies. Unfold technique takes the Alexander Technique as a springboard towards the development of the individual through movement. The work provides clear information and tools to enjoy and reconnect with your psychophysical being from the subtlety of an effortless vertical to a powerful celebration of movement. Both movement sequences and guided improvisations will be part of the sessions. Rooted habits begin to detach and a profound and sustainable transformation can be glimpsed.

15TH - 17TH OF JANUARY 2021 (14-18)
ENCOUNTER WITH THE MASK
 WITH ANNA KISTEL
 Eden Studios

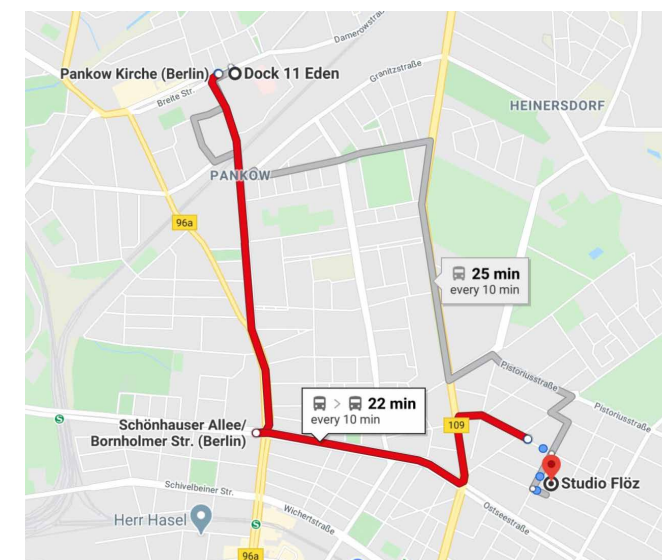

What does the mask change in us?
 How can we make it come to life through breathing, movement and our own heartbeat?
 A new being, a character comes into existence.
 Let the mask decide who you are!
 In these three intensive work days, we will encounter the Flöz masks and their capacity for narrating an emotional state or even a small story.
 We will explore the connection of mask, performer and audience by means of simple improvisations.
